

DESCRIPTION

nT02BC04 is a high-end pro audio parallel flat speaker cable . Made up of annealed oxygen free fine copper wires- 315 strands of 0.10 mm . The conductors are identified positive and negative by round and square shape of the cable .zip cord style construction makes the cable easily dividable - with high number of strands and low resistance the cable is best suitable for hi end audio installations .The cable is characterised by high flexibility and increased transmission parameters. In order to offer uniform capacitance throughout length the distance between the two conductors is maintained uniformly. Metre marking is provided at every metre . cable can be installed in channels, cable trays or in plaster. Colour Special matt pearl brown .

MANUFACTURE STANDARD

Proceeding	Description/Color	Material	Thickness	OD	Shape	Cond ohm/m	Electronic conductivity	Tension KG	Current A	Reated Voltage
