

24 PORT RIGHT ANGLE CABLE MANAGER

nT6FE03

nT6FE03 24 port Right Angle Cable Manager with silicon bush is a 19" rack mountable cable manager with slots for 24 cables. The patch cords and cables with connectors can pass through the manager to make connections to patch panels/switches more organized, clean and manageable. When cables have to come from front to left and right sides, this cable manager is the right solution for handling cables clutter-free with neat access to each cable.

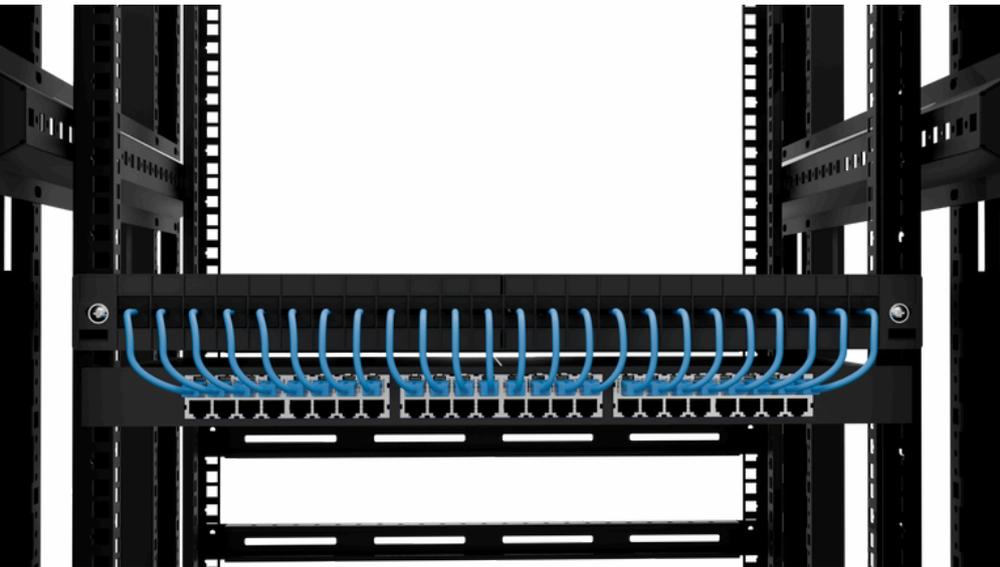

Made of ABS Plastic in 1U size, it makes cabling easy to access, neat, clean and manageable. Cables can be identified quickly and easily, with each cable removable separately without disturbing the entire cable bundle.

Available in black colour.

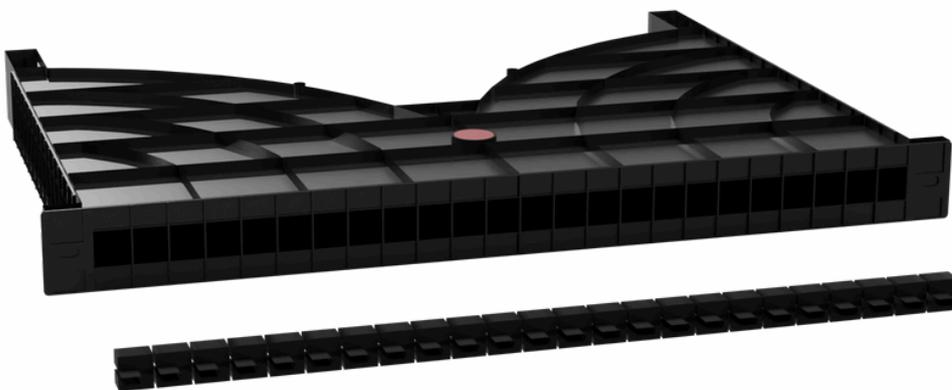

Specifications
