

LAYERED CABLE MANAGER

nT6FE06

nT6FE06 Layered cable manager features 12 slots for cables up to 8 mm OD, arranged in stacked layers to organize and separate bundles. Multiple units can be stacked vertically using nut-type screws to expand capacity without clutter. Ideal for mounting inside network racks or cable trays to achieve neat, accessible routing and quick identification of individual cables.

Specifications

No. of Slots : 12

Max Cable OD : 8 mm

Material : ABS Plastic

Mounting : Rack or Cable Tray (via screws)

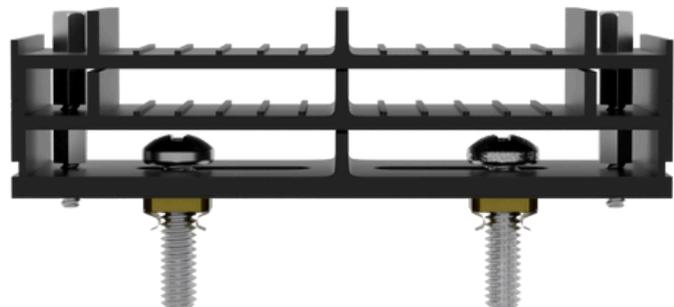

Stacking : Vertical stacking supported

Stacking Hardware : Screw-nut fasteners

Color : Black

- Stackable design – add layers vertically using screw-nut assembly

- 12 slots – each supports up to 8 mm OD cable
- Made of high-quality black ABS plastic

- Individual cable routing—each cable can be removed without disturbing others
- Ideal for patch panels, switches, and structured cabling

- Enables quick visual identification and service access
- Reduces clutter and improves airflow in racks
- Tool-free installation and maintenance
