

CABLE COMB

nT6FE08

nT6FE08 12-port Cable comb is best suitable in places where multiple cables come in a row for connecting on patch panels or switches. This keeps cables lined up and together instead of hanging loose. It makes cabling easy to access, neat, clean and manageable with quick cable identification. Cable comb saves time and space while providing aesthetic finish and easy identification of cables. Available in black colour.

Specifications

No. of Slots : 12

Max Cable OD : 8 mm

Material : ABS Plastic

Mounting : Free Hanging

Daisy Chainable : Yes

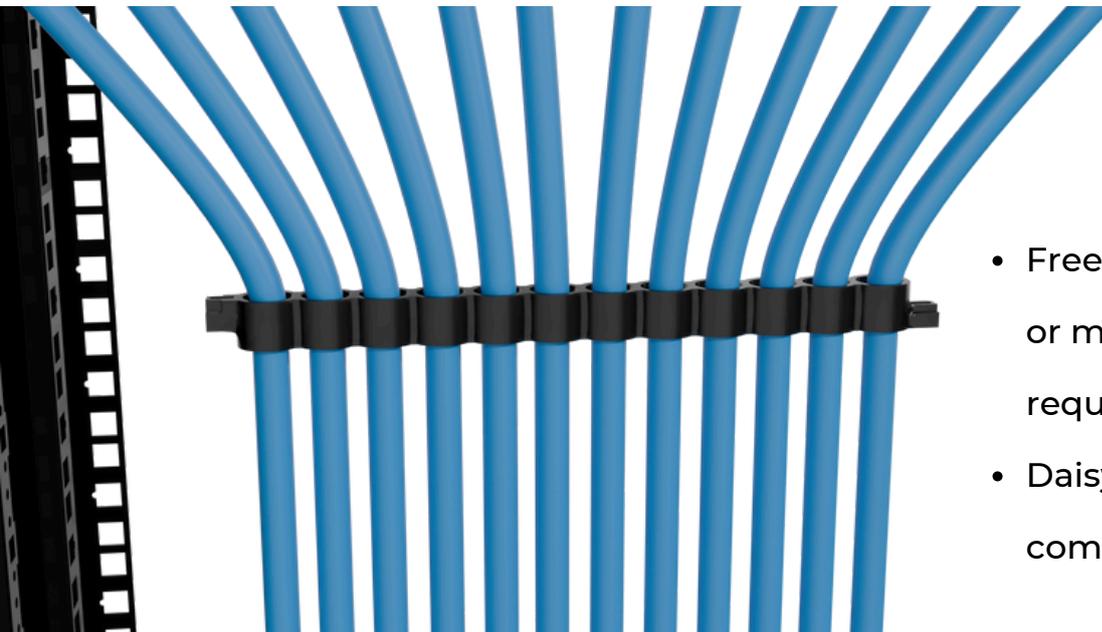

Cable Entry : Front (linear alignment)

Base Size : N/A

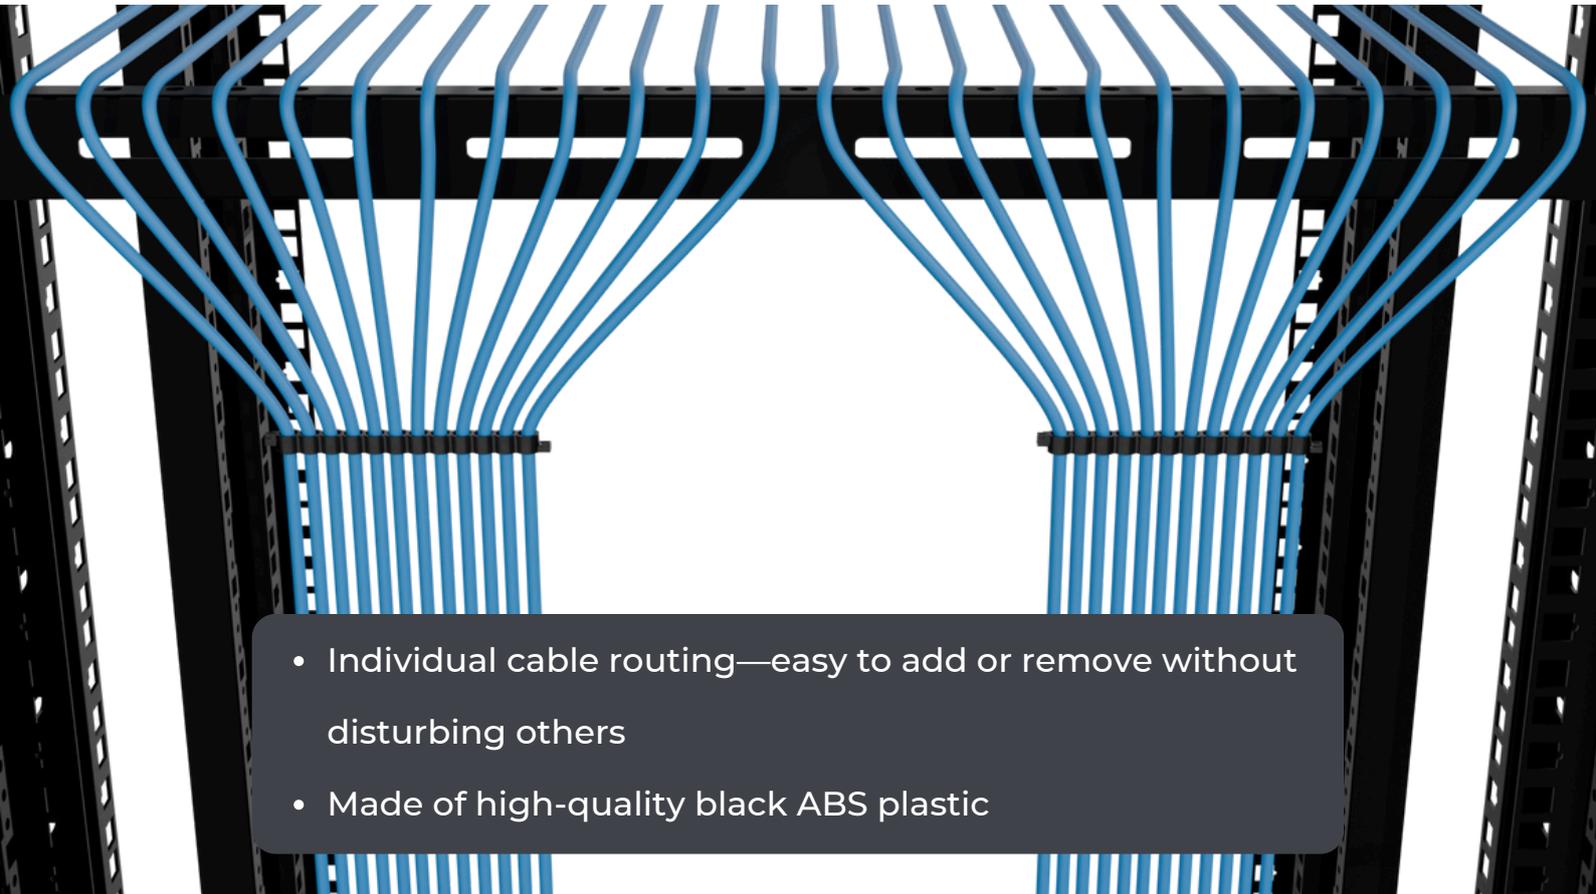

Color : Black

- 12 slots for straight-line cable alignment
- 8 mm max cable OD per slot

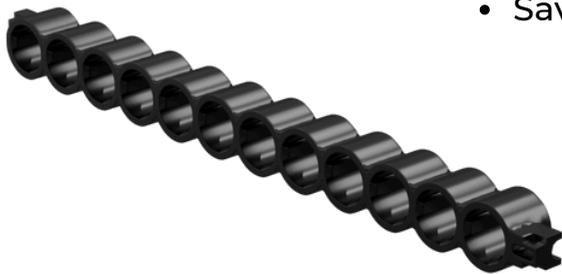

- Free-hanging design—no tools or mounting hardware required
- Daisy-chainable—link multiple combs for longer runs

- Individual cable routing—easy to add or remove without disturbing others
- Made of high-quality black ABS plastic

- Reduces clutter and improves visual organization
- Ideal for patch panels, switches, and rack cable exits
- Saves time during installation and troubleshooting
